### **County Splits Summary**

The State of California's 2011 Board of Equalization District plan splits one of the 57 counties that were small enough to have been wholly included in a single district. This county is San Bernardino and the plan splits the county between three different districts.

There are 58 counties in the State of California. 57 counties had a 2010 U.S. Census population that was small enough to have been included in a single Board of Equalization district without exceeding the district's ideal 2010 population. The ideal 2010 Board of Equalization District population is 9,313,489. This number was determined by dividing the 2010 population of the State of California by the total number of State Board of Equalization Districts.

There was one county, Los Angeles County, that had a 2010 population that was greater than a single 2011 Board of Equalization district and therefore had to be split between two or more districts.

### **City Splits Summary**

The State of California's 2011 Board of Equalization District plan splits two cities that were small enough to have been wholly included in a single district. These two cities, Los Angeles and San Bernardino are split between two different Board of Equalization districts.

There are 480 recognized cities in the State of California. All of the cities had 2010 PL-94 populations that were small enough to have been included in a single Board of Equalization district without exceeding the district's ideal population.
