County Splits Summary

The State of California's 2011 Congressional District plan splits eleven of the 44 counties that were small enough to have been wholly included in a single district. The plan splits ten of the eleven counties between two different districts and one of the ten counties between three districts.

There are 58 counties in the State of California. 44 counties had a 2010 U.S. Census population that was small enough to have been included in a single Congressional district without exceeding the district's ideal 2010 population. The ideal 2010 Congressional District population is 702,905. This number was determined by dividing the 2010 population of the State of California by the total number of State Congressional Districts.

There are fourteen counties with 2010 populations that were larger than a single 2011 Congressional district and therefore had to be split between two or more districts. These counties include Alameda, Contra Costa, Fresno, Kern, Los Angeles, Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Mateo, Santa Clara, and Ventura.

City Splits Summary

The State of California's 2011 Congressional District plan splits 41 cities that were small enough to have been wholly included in a single district. 39 cities are split

between two different districts and two cities are split between three different Congressional districts. These numbers also do not include zero population splits.

There are 480 recognized cities in the State of California. 476 cities had 2010 PL-94 populations that were small enough to have been included in a single Congressional district without exceeding the district's ideal population. This number does not include non-city entities such as Census Designated Places and neighborhoods. Four cities had populations greater than a single Congressional District. These cities include Los Angeles, San Diego, San Francisco and San Jose.
