

PREFACE

This is the fourth registration report since the 1961 Legislature.

The first report (February, 1962) contained figures as of January 2, 1962. Such January compilation, in even-numbered years, is to determine whether a new party has qualified for the primary. It also reflects political party strength at the beginning of the election year, as well as showing the number of voters not affiliated with a qualified party.

Similar reports were issued following the close of registration for last year's primary and general elections. These preelection compilations present reliable information on the trend of registration in each city, county, supervisorial district, assembly, senatorial and congressional district leading to the general election. They also show number of voting precincts in each county.

The January report, in odd-numbered years, involves cancellations of registration affidavits. Most cancellations made following the general election are for the reason that registered electors failed to vote at the general election. This is commonly known as the "registration purge."

Therefore, this report, based on county records of January 1 deadline, is intended to show figures *following the purge and before restorations*.

Its main purpose is for ascertainment of the total vote cast by party at the preceding November election. The findings will be slightly less than correct. Consideration must be given to the small number of new registrations during the period following the September close. Also, there are usual cancellations due to death and other causes. However, one political analyst has remarked: "The January report in odd-numbered years is a most important piece of political intelligence, presenting a fairly accurate picture for evaluating party turnout."
